EDI Implementation

eData Mapping Solutions can help if you are new to EDI. EDMS can implement EDI and build an EDI subsystem for your business. EDMS is highly experienced in Supply Chain, Logistics, Health Care, and Financial industry processes. EDMS builds the road map, integration strategy after a detailed study of the requirement. We have vast experience in implementing EDI subsystems on Unix, AS/400, and Windows Platforms. For new EDI systems, EDMS will:

- Install EDI Software
- Build EDI Subsystem
- Gap Analysis, EDI Mapping
- Build FTP Scripts & Build EDI Support Model

EDI Production Support and Mapping

It is not only critical for any business to see that they are receiving their Orders, Shipments, and Invoices from their customers electronically but they also must be able to translate, upload and integrate these documents into their Application Software efficiently. If you are in a situation where you have an EDI Production Support issue, and if you are looking for help immediately then EDMS is happy to assist you. EDMS has highly experienced professionals that have handled medium to large EDI Systems and can help you for any type of requirements that you might have.

If you have an EDI Mapping issue, your EDI Mapping is not working, need to be in compliance with the customer, need to include segments, then EDMS has experience to handle any of these situations. EDMS has all the expertise to do SAP IDOCS, ODBC Mapping, Flat File Mapping or XML. Call us at 614-495-7178 or email us sales@edatamapping.com.

EDI Training

EDMS is a quality EDI training provider. We provide in-house EDI training for your employees. EDMS can train you and your staff on your EDI software and all the EDI processes.

Staffing Services

EDMS provides highly qualified IT professionals for your company. Through EDMS staffing services, you can be sure you are receiving proficient technical expertise in areas of technology, such as, SAP, Oracle, Unix, AS/400, Mainframe, Java, DB2, SQL, .Net, ASP, and VB.
